

Manoj K

Data Science Professional

Salem, Tamil nadu — +91 9025847629 — mk539892@gmail.com — LinkedIn — GitHub

Profile Summary

Dedicated Data Scientist with a robust B.Sc. in Physics and a top-tier Data Science certification (A+). Proficient in Python, SQL, and the entire data science toolkit, demonstrating expertise in ML, NLP, Pandas, NumPy, Matplotlib, and Seaborn. Proven track record in diverse projects focusing on data analysis, predictive modeling, and feature engineering. Committed to contributing hands-on expertise, problem-solving skills, and effective communication to drive innovative data solutions. Eager to shape the future of data through continuous learning and critical thinking.

Skills

Technical Skills:

- Python, SQL, Data Science, Machine Learning, Algorithms, Natural Language Processing (NLP), Statistics
- Pandas, NumPy, Matplotlib, Seaborn
- Data Analysis, Data Visualization, Predictive Analysis, Predictive Modeling, Model Validation and Evaluation
- Data Cleaning and Preprocessing, Data Mining, Database Management, Django

Soft Skills:

- Communication, Problem-Solving, Team Collaboration
- Quick and Continuous Learning, Adapting, Critical Thinking

Projects

1. Sentiment Analysis Using NLP

- Collected movie review datasets from the internet.
- Preprocessed the data, applied Textblob for sentiment analysis.
- Analyzed results using Seaborn.

2. Sentiment Prediction Using ML

- Downloaded three movie review datasets for three different genres from the internet.
- Pre-processed the data, split data for training and testing (80:20).
- Vectorized textual data using count vectorizer.
- Created a machine learning model (Naive Bayes) and evaluated using Accuracy Score metric.

3. Word Cloud Using NLP

- Collected a movie review dataset.
- Created a function to concatenate each row.
- Performed some NLP processes using NLTK.
- Analyzed the frequency of words using a bar plot from Matplotlib.

4. Air Quality Forecast Using ML

- Collected New Delhi air quality dataset from the internet.
- Applied preprocessing steps, including handling missing data.
- Used Pearson's correlation for feature selection.
- Built a machine learning model (Random Forest) and evaluated using RMSE.

5. Car Purchase Prediction

- Gathered customer decision dataset from the internet.
- Applied preprocessing steps, used Anova correlation for feature selection.
- Split independent and dependent data (7.5:2.5).
- Built a machine learning model (Linear Regression) and evaluated using MAE.

Experience

Python Developer Internship — Universal Zhone, Chennai — 01-2023 to 06-2023 (6 months)

- Acquired proficiency in Python and SQL, creating a Database and Table in XAMPP.
- Developed methods for data insertion and update.
- Created a Dashboard for CRUD Operations.

Certification Course

Data Science — AIT Language Academy — Chennai — 2023

Grade: A+

Education

B.Sc. Physics — Periyar University — Salem — 2020-2023

CGPA: 7.5
